## Kingsbury Texas

*News & Information Newsletter*

*Dear Kingsbury,*

*Here's the latest on what's going on in Kingsbury!*

### 50 And Fabulous!

The **50th** Annual Kingsbury Volunteer Fire Department Bar-B-Q was Saturday and it was Fabulous!

Thanks to the KVFD and Auxiliary and all the volunteers who help pull this big event off every year.

### National Model Aviation Day Event

The Tri City Flyers Model Aircraft Club Announces Their 2019 AMA National Model Aviation Day Event to be held August 17th at the Old Kingsbury Aerodrome.

News release from the Tri City Flyers:

**Kingsbury, Texas, July 8, 2019** – Tri City Flyers, Inc. a local **aeromodeling** club is pleased to announce our AMA National Model Aviation Day Event at our flying field located at the Old Kingsbury Aerodrome in Kingsbury, Texas. This event will be held on August 17, 2019, from 9 am 3 pm. The event includes Radio Controlled Model Aircraft flight demonstrations, a display of model aircraft, Model Aircraft simulator, and plenty of food and drinks; we will be serving free hotdogs at noon. The Pioneer Flight Museum, housing full size antique aircraft, will be open. Flying is open to all AMA pilots; pilot flying fee will be a \$20 donation per pilot. Best of all the proceeds from the event will go to help non-profit organizations in our local community. Please come join us for a great fun filled day and help raise funds for the Pioneer Flight Museum and the Kingsbury Volunteer Fire Department.

Tri City Flyers, Inc. is a local 501 (c) (7) non-profit organization founded in 1971, to promote the educational and recreational benefits of model aviation.

#### About Academy of Model Aeronautics:

Founded in 1936, the non-profit Academy of Model Aeronautics is the world's largest model aviation association, representing a membership of about 200,000 for the purpose of promotion, development, education, advancement, and safeguarding of modeling activities. Academy of Model Aeronautics is the voice of its membership, providing liaison with the Federal Aviation Administration, the Federal Communications Commission and other government agencies. Academy of Model Aeronautics also works with local governments, zoning boards, and parks departments to promote the interests of local chartered clubs. Academy

of Model Aeronautics seeks to introduce young men and women to the art and craft of aeromodeling. Through an active educational outreach program, Academy of Model Aeronautics supports teachers and community-based organizations who wish to infuse topics in math, science, and technology with aviation activities. In addition, each year Academy of Model Aeronautics presents Charles H. Grant Scholarships to exceptional students who are active in their community and in modeling. Since 1970 the Academy of Model Aeronautics has awarded \$1 million dollars in scholarships to hundreds of students to study aerospace design and engineering and other aviation related fields.

For more information on Academy of Model Aeronautics visit [www.modelaircraft.org](http://www.modelaircraft.org).

## There's A Day For Everything

In case you didn't already know ... there's something every day to **celebrate!**  
Here are some of the fun, unusual, or forgotten holidays this week:

**July 28th - National Milk Chocolate Day, Buffalo Soldiers Day, National Waterpark Day, National Parent's Day**

**July 29th - National Lasagna Day, National Lipstick Day, National Chicken Wing Day**

**July 30th - National Cheesecake Day, National Father-in-Law Day, National Whistleblower Day**

**July 31st - National Avocado Day, National Raspberry Cake Day, National Mutt Day**

**August 1st - National Mahjong Day, National Raspberry Cream Pie Day, National Girlfriends Day, National Minority Donor Awareness Day, Respect for Parents Day, National IPA Day**

**August 2nd - National Water Balloon Day, National Coloring Book Day, National Ice Cream Sandwich Day**

**August 3rd - National Georgia Day, National Watermelon Day, National Grab Some Nuts Day, International Beer Day, National Disc Golf Day, National Jamaican Patty Day, National Mustard Day, Mead Day**

## Hello August!

This week will see the first days of the month of August.

August is the eighth month of the year in the Julian and Gregorian calendars and the fifth month to have the length of 31 days. In the Southern Hemisphere, August is the seasonal equivalent of February in the Northern Hemisphere. In many European countries, August is the holiday month for most workers.

Certain meteor showers take place in August. The Kappa Cygnids take place in August with the dates varying each year, the Alpha Capricornids meteor shower takes place as early as July 10 and ends at around August 10, and the Southern Delta Aquariids take place from mid-July to mid-August with the peak usually around July 28–29. The Perseids, a major meteor shower, typically takes place between July 17 - August 24, with the peak being August 13 this year.

The star cluster of Messier 30 is best observed around August.

This month was originally named *Sextilis* in Latin, because it was the sixth month in the original ten-month Roman calendar under Romulus in 753 BC, when March was the first month of the year. About 700 BC it became the eighth month when January and February were added to the year before March by King Numa Pompilius, who also gave it 29 days. Julius Caesar added two days when he created the Julian calendar in 45 BC giving it its modern length of 31 days. In 8 BC it was renamed in honor of Augustus (despite common belief, he did not take a day from February). According to a Senatus consultum quoted by Macrobius, he chose this month because it was the time of several of his great triumphs, including the conquest of Egypt.

*Summer declines and roses have grown rare,  
But cottage crofts are gay with hollyhocks,  
And in old garden walks you breathe an air  
Fragrant of pinks and August-smelling stocks.*  
—John Todhunter (1839–1916)

August's zodiac signs are Leo (July 23–August 22) and Virgo (August 23–September 22).

### AUGUST FACTS & FOLKLORE

On August 17, the Cat Nights begin, harking back to a rather obscure Irish legend concerning witches and the belief that a witch could turn herself into a cat eight times, but on the ninth time (August 17), she couldn't regain her human form. This bit of folklore also gives us the saying, "A cat has nine lives." Because August is a yowly time for cats, this may have prompted the speculation about witches on the prowl in the first place!

As August, so February.

>> o<<

Observe on what day in August the first heavy fog occurs, and expect a hard frost on the same day in October.

>> o<<

If the first week of August is unusually warm, The winter will be white and long.

>> o<<

So many August fogs, so many winter mists.

~ ~ ~  
*When it rains  
in August,  
It raises honey  
and wine.*  
~ ~ ~

August's birth flowers are the gladiolus and the poppy.

The gladiolus means strength and sincerity.

A red poppy symbolizes pleasure or consolation; scarlet, extravagance; white, sleep.

August's birthstone is peridot, which is said to symbolize strength.

The peridot is a gem form of the mineral olivine that appears in various shades of green, sometimes with a brown or yellow tinge. Called "evening emerald," the peridot was often mistaken for that other gem. It symbolizes strength and was said to protect the wearer from nightmares.

A previous birthstone for this month was sardonyx, which is characterized by alternating bands of sard and onyx, both forms of chalcedony. Although it can appear in several colors, it is usually reddish and white. It is thought to bring courage, happiness, and eloquence.

Legend says that Queen Elizabeth I once gave the Earl of Essex a ring made of sardonyx, pledging her aid if he was ever in

need. Later on, when accused of treason and scheduled for execution, he tried to send the ring to her but an enemy intercepted it. The queen learned of his plea only years later, after he had been beheaded.

## Kingsbury Volunteer Fire Department

Regular meetings of the Kingsbury Volunteer Fire Department are scheduled for the first Thursday of each month at 7:30 at KVFD Fire Station #1. The next is

Thursday, August 1st

Stop by to learn what you can do to help your community as a firefighter, a supporter, or as a first-responder.

The KVFD Auxiliary has their meetings on the first Thursday of most months starting in March. The next meeting of 2019 will be Thursday, August 1st and all meetings start at 6:00 p.m. in the Kingsbury VFD fire station. Come by and be a part of the awesome KVFD Auxiliary!

## Black Moon

This Wednesday night, the Black Moon will rise!

Like “Blood Moon” and “Blue Moon,” “Black Moon” is not an astronomical term. In fact, if you ask a sample of astronomers, both professional and amateur, very few will have even heard of it. It’s not even a particularly widely known folklore thing.

As for its definition, it’s a “Black Moon” if there is a new Moon twice in the same month. It’s similar to the Blue Moon, which has become a common term for the second full Moon in a month.

There is no astronomical significance to a Black Moon. Nothing happens, except the usual new Moon absence of any Moon in the sky, plus the stronger so-called “spring” tides we get for a few days around every full Moon and new Moon.

What will you see during a Black Moon? Uh, not much. During the new Moon phase, the Moon is not illuminated by the Sun and seems to disappear from the night sky. A new Moon is practically invisible to the naked eye, so there’s nothing to see during a so-called Black Moon.

Remember, there are four quarters of the Moon—the Moon phases. You all know the “full Moon,” when the entire disk of the Moon is illuminated by the Sun (because they are on opposite sides of the sky). In contrast, the “new Moon” has its dark side facing us. It’s not reflecting any of the Sun’s light because the Moon is lined up between the Earth and Sun.

Although there’s not much to see when a Black Moon rises, the good news is that a moonless sky is excellent for stargazing

since the Moon's light won't drown out the stars!

### Kingsbury News Past

All the **news** that's fit to print about what *was* happening in Kingsbury . . .

The July 21, 1875 edition of the *Galveston Daily News* had several mentions of Kingsbury! In the Luling section, it's reported that Kingsbury is the terminus of the GH&SA railroad and you can catch the stage coach from here to "San Antonio and the west" every day ... "Mondays excepted".

The News also ran the ad that's been in several papers in 1875 about the new Kingsbury Station. This ad does a pretty good job of not spelling us as "Kingsburry" ... until the very last word!

**The Galveston Daily News.**

ESTABLISHED=1842. GALVESTON, WEDNESDAY, JULY 21, 1875. PRICE-FIVE CENTS. VOL. XXXV.—No. 166.

**FROM LULING.**

**The Location of the Western Penitentiary.**

[*Special to the Galveston News.*]

LULING, July 20, 1875.

The Western Penitentiary Committee spent the day here Saturday, and started for San Antonio Sunday morning. They received propositions from some of our citizens to locate the Penitentiary here, which were favorably received by the committee. As we have the best water-power in Western Texas, with a country in a high state of cultivation adjacent to our little city, hopes are entertained that they will locate the Penitentiary here.

The stages for San Antonio and the west leave Kingsbury, the terminus of the Galveston, Harrisburg and San Antonio Railroad daily, Mondays excepted, leaving Kingsbury at 7 o'clock A. M.

The Sheriff's posse are in close pursuit of Brigham, the murderer of Jesse Bond.

**TOWN LOTS FOR SALE**

**— AT —**

**Kingsbury Station.**

The GALVESTON, HARRISBURG AND SAN ANTONIO RAILWAY will be opened to this station on or about the 15th of July.

Business and residence lots for sale on and after July 1st. Terms, one-half cash in United States currency, and balance in twelve and twenty-five months.

For health and business, go to

**KINGSBURY,**

located on the division ridge between the water and fertile valleys of the San Marcos and Guadalupe rivers, and six hundred and fifteen feet above the Gulf of Mexico; forty-two miles east of San Antonio, eleven and a half miles west of Luling, and nine and a half miles from Seguin. For further information, apply to Capt. G. W. POLK, Town Agent, at Kingsbury.

JAMES CONVERSE,  
Chief Engineer.

In other 1875 news, Mr. W.G. Kingsbury (our town's namesake) had a very long article about Western Texas being "strangely neglected" by immigrants "mostly on account of its want of easy communication with the outer world". Mr. Kingsbury mentions several counties with available land including "Guadalupe". You really have to read how he expounds on how great this part of Texas is and how the "Mexicans and Indians" cure their meat in the open air and how everyone sleeps out of doors the weather is so perfect and the air is so "pure"!

Also, you can get your wrapping paper at the News office (I wonder if that is just old newspaper paper?!), and the steamer *Texas* showed up in New York from Galveston and Key West with yellow fever, but Dr. Peete says it didn't come from Galveston. There is a reward for the "Lost Aeronauts" which would have been Washington Harrison Donaldson and Newton S. Grimwood who took off in Mr. Donaldson's hot air balloon over Lake Michigan (Mr. Grimwood had won the prize of riding in the balloon) and were never seen again. And check out the amazing trail a bolt of lightening took at Mrs. Philbrick's house - into the pantry, through the coffee pot, soldered the ladle to the bottom of the water pail, and even singed the cat smooth!

#### SOUTHWESTERN TEXAS.

Mr. W. G. Kingsbury, Agent of the Texas Bureau of Immigration at St. Louis, is doing a good work for Southwestern Texas, as well as for those selling homes in this State, by bringing forward some of the inducements held out by immigrants in Western Texas, a most fertile and inviting portion of the State, which has been strangely neglected since the war, mostly on account of its want of easy communication with the outer world. In answer to a string of interrogatories from Wm. Wilson, Esq., of St. Louis, Mr. Kingsbury gives the following among other equally useful information:

In which counties can unappropriated land be found?

There is scarcely a county in Western Texas in which there is not more or less public land. The Austin *State Gazette* of May 19, last, says: "There is more than thirty thousand acres in Travis county. This land is much of it quite rough, broken and stony, but a portion is good farm land; all of it is excellent for pasture and, and timber upon it for fencing purposes." The *Progressive World*, edited by Prof. R. O. Thompson, who has had much to do with Texas lands, says in its June number: "There is, in the counties of Travis, Hays, Caldwell, Guadalupe, Bexar, Comal, Kendall, Gillespie, Blanco, Mason, Menard, Kimble, Kerr, Bandera, Uvalde and Edwards, more than three million of acres."

#### What is the altitude of some points in Southwestern Texas?

San Antonio is 636 feet, Kendall county is 1200 feet, and Gillespie county approximates 2000 feet, and is less than two hundred miles from the sea coast. This great altitude in so short a distance, and sloping as it does from north to south, and having the full benefit of the cool southern trade winds, makes it the most salubrious, healthful and delightful climate to be found upon the globe. The water courses all have a rapid flow to the sea; there is not a lake, swamp or stagnant pond of water within two hundred miles of San Antonio or Austin. The air is so pure that fresh meat does not spoil when exposed to a free circulation; indeed the Mexicans and Indians cure all their meat by drying it in the open air; and the people generally sleep out of doors, with perfect assurance that they will neither contract colds nor fevers, and yet the nights are always cool and sleep sweet and refreshing. Mr. John C. French, an old and highly-respected citizen of San Antonio, spent most of last year in Florence, Italy, and he declares that although the two countries are similar in some respects, and have identically the same grass and timber, it is not to be compared to Southwestern Texas in salubrity of climate.

#### SANITARY.

Dr. Peete, health physician at this port, yesterday telegraphed through the Associated Press the following dispatch:

SANITARY DEPARTMENT,  
GALVESTON, July 20, 1875.

Having information of the existence of yellow fever on board the steamer *State of Texas*, now at New York, (one of the line hence to New York via Key West) and fearing that the existence of yellow fever in Galveston may be inferred therefrom, I hasten to inform the public that no case has occurred here, either in the city or on shipboard, and that the health of the city is unusually good.

GEORGE W. PEETE,  
Health Physician.

#### THE LOST AERONAUTS.

CHICAGO, July 20.—Seven hundred dollars reward is offered for the bodies of the aeronauts. Several tugs are searching the lake.

LIGHTNING played some remarkable freaks in the house of Mrs. Philbrick, at Alton, Mo., last week. It entered at one end, passed between Mrs. Philbrick and her son into the pantry, where it pierced holes in the top and bottom of a coffee-pot, jarred a dipper into a tin water-pail and soldered them firmly together. A cat was singed as smoothly as though she had been clipped, without otherwise injuring her.

#### WRAPPING PAPER.

CHEAPEST IN THE CITY.

APL. 15, 1875. AT "NEWS" OFFICE.

Elsewhere, a house has sunk into the sand ... again ... and is now "evidently bound for China", horses and mules are running amok, and the German-American Ladies College in Austin (which was open until 1937) is taking students. The GH&SA railway (I love the little train graphic) cost \$6 (about \$140 today) to get to San Antonio "on a single ticket" (you had to change from train to stage coach in Kingsbury) and has "sleeping cars attached to all Night Trains", and Mr. Flato is a "Banker and Dealer in Exchange" in Flatonia (yes, Flatonia was named after the Flato family, not because it's flat!). A lady had to have her corset strings cut which "popped like a champagne cork", and if you're bound for another port you can take a "new iron steamship" or a "clipper-built schooner". I'm taking the sailing ship!

**Old for China!**

The old house on the beach, which has been so long sunk in the sand, was raised last Saturday to its original level, but again sunk during Monday night, and is now evidently bound for China.

**Runaway.**

A horse attached to a buggy, and driven by Mr. Heidenheimer, whose property he is, took flight on Strand yesterday, at the corner of Twenty-second street, and dashed off at a fearful rate. Mr. Heidenheimer was thrown out, and the buggy wrecked, while the animal was taken away from the debris lame. The animal ran but a short distance, striking a dray in the transit.

A mule drawing a dray, upon which there was a quantity of tinware, tried the same game on Mechanic street, but was checked before proceeding far.

**German-American Ladies' College  
AUSTIN, TEXAS.**

The aim of this Institute is to afford young ladies a course of instruction which is in full harmony with all the requirements of modern education. The pupils are carefully taught the English, German, French, Spanish and Latin languages, as well as all the elementary and higher branches by seven experienced teachers. For further information apply to the Principals.

NATALIE VON SCHENCK & ALICE NOHL.

**Happy National Catfish Month!**

Yes, **August** is National Catfish Month.

In addition, it is also:

National Wellness Month      National Crayon Collection Month

Family Fun Month      National Catfish Month

National Eye Exam Month      National Golf Month

National Peach Month      National Water Quality Month

Romance Awareness Month      National Goat Cheese Month

Happiness Happens Month      National Sandwich Month

National Panini Month      National Brownies at Brunch Month

Get ready for Kindergarten Month      Black Business Month

National Immunization Awareness Month      International Peace Month

MedicAlert Awareness Month      Motorsports Awareness Month

Children's Eye Health and Safety Month      Spinal Muscular Atrophy Awareness Month

National Back to School Month

**AUGUST**

national catfish month

**Meteors Peak This Week**

As you may know, there are three separate meteor showers currently active. And this week, two of those showers are going to

peak!

Meteors are caused by streams of **cosmic** debris entering the Earth's atmosphere at extremely high speeds. Smaller fragments burn in the atmosphere producing a "shooting star", but the bigger ones can really produce an amazing big fireball.

And when the space rocks (meteoroids) of any powerful meteor shower enter Earth's atmosphere, you'd better be ready for a great night of shooting stars.

The Alpha Capricornids are currently active and run from July 3rd to August 15th this year with a "plateau-like" maximum centered on July 29-30. This shower is not very strong and rarely produces in excess of five shower members per hour. What is notable about this shower is the number of bright fireballs produced during its activity period. This shower is seen equally well on either side of the equator.

The Southern delta Aquariids started July 12th and can be seen until August 23rd. The Delta Aquariids are another strong shower best seen from the southern tropics. North of the equator the radiant is located lower in the southern sky and therefore rates are less than seen from further south. These meteors produce good rates for a week centered on the night of maximum - July 29-30. These are usually faint meteors that lack both persistent trains and fireballs.

The Perseids are the most popular meteor shower as they peak on warm August nights as seen from the northern hemisphere. The Perseids are active from July 17 to August 24. They reach a strong maximum on August 12-13 this year. Normal rates seen from rural locations range from 50-75 shower members per hour at maximum. The Perseids are particles released from comet 109P/Swift-Tuttle during its numerous returns to the inner solar system. They are called Perseids since the radiant (the area of the sky where the meteors seem to originate) is located near the prominent constellation of Perseus the hero when at maximum activity.

The night of July 29th when the Alpha Capricornids and the Southern delta Aquariids peak, the moon will be only about 6% full so the shooting stars will be much easier to spot. Get out your lawn chair and bug spray and check out some of the best that Nature has to offer!

## Kingsbury Weather

Kingsbury weather for this week. You can always get the latest **weather** in Kingsbury on the Kingsbury website under [Calendar](#).

For current temperature, rainfall totals, wind speed, etc. just click on the bar at the bottom to go directly to the Baker Ranch weather station in Kingsbury. You can view local conditions and all the other weather stations in the TexMesonet network.

Click here to check out the Texas Water Development Board "Baker Ranch" weather

## Burn Ban Status

It's getting drier and **drier**. Texas is now up to 60 counties with a burn ban in place.

There is currently no burn ban for Guadalupe County. But it is always wise to take care when you are:

- 🔥 Welding, cutting, and grinding or any activity that causes a spark
- 🔥 Burning household trash
- 🔥 Burning of other items

As always, please take precautions and report any fire hazards immediately to the Kingsbury Volunteer Fire Department at 639-4499. To report a fire, please dial 911.

## First Kingsbury Mail Service

Kingsbury mail carrier, Albert Wolfshohl, delivering mail with horse and buggy. Mr. Wolfshohl was born August 16, 1878 and passed away June 3, 1958 and is buried in the Kingsbury Cemetery.

Mr. Wolfshohl started mail route "RFD Route No. 1" (as seen on the side of the mail **wagon**) in Kingsbury. The buggy is great - it is small but covered so that Mr. Wolfshohl could deliver the mail in relative dryness during inclement weather. "Neither snow nor rain nor heat nor gloom of night stays these couriers from the swift completion of their appointed rounds." That's all well and good, but a cart that is covered makes the "appointed rounds" a little less miserable in the rain.

A local mail carrier kept a journal and the July 14, 1904 entry says "Franklin Hickman sold horse to Wolfshohl for \$15 for mail cart." The next day, "July 15: Albert Wolfshohl started mail route R.F.D. #1".

Mr. Wolfshohl apparently took his children along on occasion, which they seemed very, very happy about! The horse, on the other hand, seems to pause just long enough to pose for the camera and now just wants to get on with the job of delivering Kingsbury mail.

I wonder if this is the \$15 horse?

## Know someone that should be on the Kingsbury Newsletter eMail List?

Send them this email! All they need to do is go to the [Kingsbury website](#), click on the weird little **dog** at the bottom of any page, and fill out their name and email address. It's so easy! Let's get everybody to be "in the know" about what's going on in their community.

Thanks!
